FILTRATION SOLUTIONS

DONALDSON SITE SERVICES FOR DUST COLLECTION

MAINTAINING THE PERFORMANCE AND SECURITY OF YOUR FILTRATION SOLUTION

Filtration equipment is an essential part of your operation. Dust, Fume and Mist collection systems are installed to help protect your employees, your business and the environment - in a safe controlled manner whilst enhancing production performance.

To maintain their designed performance, these systems need to be regularly checked and serviced.

The cost of a poorly maintained filtration solution can be dramatic for your business - problems can range from an increase in energy usage, compressed air consumption, to unplanned maintenance interventions and unexpected process downtime.

A good regime of preventive maintenance and regular servicing will help lower your total cost of ownership and ensure the continuity of operations.

BENEFITS OF DONALDSON SITE SERVICE PACKAGES

- Expertise in dust filtration technology and media
- Fully trained and qualified service engineers
- Local service capability of a global organization
- Comprehensive service offering from a single source, simplifying processes and reducing administration costs
- Donaldson Genuine filter media and components

DONALDSON SERVICE HELPS YOU TO:

- **Avoid unplanned down time**
- **Optimize production**
- **Protect employees, production and the environment**

STANDARD SITE SERVICE

INSPECT

Our Service Engineer will carry out a detailed inspection of the dust collector and the main components. At the end of the visit an inspection report will be provided.

INSPECTION

Our Service Engineer will inspect and assess the overall condition of the dust collector and filter media.

Function and Fit assessment*

- Filter media
- Clean air plenum and dirty air plenum
- Ductwork system
- Set-up cleaning system and components

System start-up & Measurements recorded

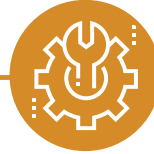

Our Service Engineer will perform air flow and pressure drop measurement pre and post service. The controller settings will be checked and adjusted as required.

**Detailed list available on the Service Report upon completing the visit.*

PROTECT

In addition to INSPECT our PROTECT package is a complete service which also includes the supply and fitting of a new set of filter media, comprehensive service report and visit feedback.

COMPLETE ON SITE SERVICE

Preventive maintenance

Our Service Engineer will carry out preventive maintenance and service on the collector (cleaning system, seals, dust disposal etc.) and on the media to avoid breakdown and malfunction.

Set of new filter media included

Complete set of filter media included within the service.

Fitting of new filter media

- Removal of dirty filter media
- Installation of new filter media
- Ensure correct fit and sealing

SPARE PARTS AVAILABILITY

Genuine Donaldson components on stock

Our Donaldson European Distribution Centre holds extensive stock of genuine components.

The facility currently serves over 160 countries.

Service Van Stock

Our service vehicles carry the most common consumable components, which gives the immediate availability to supply and fit during the service.

REPORT

Comprehensive Service Report

- Detailing work undertaken
- Measurement pre and post service
- Components installed
- Maintenance record keeping

CONSULTATION

Feedback of the Service

Our Service Engineer will provide you with overall feedback, recommendations from the service and provide advice on:

- Condition of the dust collector
- Any upgrade requirements
- Additional components
- Maintenance prediction
- Further recommendations

PROTECT PLUS

In addition to PROTECT, our PROTECT PLUS package also includes the supply and fitting of a service kit.

SERVICE KIT

Consumable Components

The service kit* contains all the essential consumable components, in addition to the filter media.

Supply & Fit

During the visit the components of the service kit will be supplied and fitted to ensure a safe and well-functioning dust collection system.

* Service available on selected dust collector types.

FLEXIBLE SITE SERVICE

ADDITIONAL SITE SERVICES

Outside of our standard packages, we also offer a wide range of site service capability
